Subject: Donlin Scoping

Attachments: Prelim scoping.docx

Mark,

Sorry for the delay but here is my prelim list.

(See attached file: Prelim scoping.docx)

A. Environmental Setting Section

1. Baseline Water Quality

- a. the period of the record of the collected water quality data.
- b. list of parameters for which data has been collected (if any parameters have been dropped, specify why).
- c. QA/QC with adequately low detection levels.
- d. maps showing the locations and terrain elevation of all past and present data collection stations (explain any that have been dropped or location changed).

2. Discuss air quality, climate and visibility conditions.

3. Identify and discuss applicable water quality regulations, standards, and guidance.

4. Identify and discuss required wastewater permits.

B. Consequence/Impact Section

1. Include a plot plan/facility layout showing affected watershed boundaries with location of all discharge points, buildings, structures, north arrow and scale.
2. Discuss treatment alternatives. Provide estimates of effluent quality.
3. A draft APDES permit published with the draft EIS would be beneficial to the public.

C. References

There should be a reference sections for sources of assumptions, information and data.
